Fiscal Year 2013 Capital Improvement Program

Capital Program Overview

Capital Improvement Program Overview

Capital Improvement Planning Process

The Fiscal Year 2013 (FY 13) Capital Improvement Program (CIP) was organized and compiled by the Director of Public Works with the support and input from various Departments. The staff worked together to carefully review the City's capital needs and to prioritize project submittals based on established criteria.

The Department of Financial Management provided the revenue projections necessary for the Director to determine the type and amount of resources available to finance proposed capital projects. Specifically, Financial Management monitors fiscal trends at both the local and state levels. Analyses of property, sales, and user tax revenues and State and Federal legislation contribute to their economic forecast.

Operating Budget Impacts/Operating and Maintenance Costs

One of the many issues evaluated through the CIP process is the impact new projects may have on departmental operating budgets. These ongoing operating costs can affect a department's ability to fully utilize the facility and provide quality services. By addressing these costs at the outset of the process and including adjustments in the operating budget, other important services will not be compromised in future years.

Information Document

The CIP identifies the adopted budget for each program that will receive funding in FY 13, including the funding sources and charts showing funding allocation percentages. The CIP also includes an historical perspective. The CIP's multi-year character is reflected in the historical summaries to show the fiscal activity for each program, from inception through FY 12.

Carryover Balances

The Financial Summaries and individual Program pages include an FY 12 Carryover column. These carryover amounts may be currently planned for projects in the design stage, pending contract award, or committed to an approved contract. Therefore, carryover amounts are not necessarily available for new projects.

Actual Expenditures

The Adopted CIP includes actual FY 12 project expenditures that are unaudited and reflect amounts captured as of a specific cutoff and time period for fiscal year-end. Unaudited expenditures are included in the financial summaries, individual program pages, and the funding detail.

Guide to the Capital Improvement Program

Introduction

The Fiscal Year 2013 (FY 13) Capital Improvement Program (CIP) represents the City's short-range strategic capital investment. The CIP identifies and provides for two types of expenditures: the first covers strategic improvements to the City's existing infrastructure and the second involves one-time projects designed to address important community needs. To view and obtain additional project information, please visit the CIP website at www.lbcip.com.

How this Document is Organized

The majority of the book is composed of the 10 major sections of capital improvement programs that are defined by the type of capital investment. The Public Works Department manages CIP programs in sections 1 through 6; the indicated departments manage programs in sections 7 through 10. The following is a summary of each section.

1. **Marinas, Beaches & Waterways** - Two of the many assets that make Long Beach unique are its beaches and marinas. These City operated and maintained resources provide recreational enjoyment to both residents and tourists. In FY 12, a number of infrastructure improvements were made. The Belmont Plaza Pool recently had major repairs made to its piping and circulation. The long-awaited Alamitos Bay Marina Rebuild Project broke ground and began construction on Basin 4. Several beach restrooms began the design and permitting phase, along with the Leeway Sailing Center replacement, and the new beach pedestrian path.

In FY 13, improvements will include building and renovating beach restrooms, replacing access stairways, upgrading beach parking lots, and improving beach bicycle access. Additionally, the Alamitos Bay Marina Rebuild is anticipated to continue in phases as funding is identified and secured.

2. **Parks & Recreation** - Parks located throughout the City provide recreational amenities and open space to enhance the environment and provide leisure opportunities to meet the needs and interests of residents. There is a constant effort to address aging park facilities throughout the City.

During this past year, construction commenced on Baker Street Mini Park and Colorado Lagoon dredging. Construction was completed at 14th Street basketball courts, Orizaba Park expansion, and McBride Skate Park and Teen Center. Additionally, design is underway for the new Orizaba Community Center. Grants were received for construction of a new park at 7th Street and MLK Jr. Avenue and new soccer fields at the Drake Chavez Greenbelt. FY 13 funded projects include replacing park bike paths and repairs to the Rancho Los Cerritos facilities.

3. **Public Facilities** - Long deferred critical repairs are required to sustain the integrity of various health, library, fire station, police station, Civic Center, and other key facilities. A facility assessment performed in FY 07 evaluated the condition of 132 structures totaling 1,916,769 square feet. The assessment identified deficiencies in each facility and provided cost estimates to perform repairs required to maintain each facility in an efficient and reliable operating condition. In FY 13, Civic Center funding will address some deficiencies in City Hall and the Civic Center complex. Such project allocations include upgrading the halon panels in the telephone room and data center, replacing variable frequency speed drives in the cooling towers, cleaning air ducts, and replacing floor tiles in the lower level of City Hall. Also, included in some of the improvements are replacing the water detection system in the data center and recalibrating energy systems in City Hall to maximize efficiency.

The Convention Center's FY 13 project improvements completes the transformation of the arena into a ballroom facility, renovates some of the arena's restroom and restaurant facilities, and enhances the arena lobby area and Light-Emitting Diode (LED) lighting. These improvements, funded by Measure D Oil Revenue, will increase the Center's marketability while maintaining this important City asset. The Fleet Services Bureau will continue to upgrade regional fuel storage sites and install a service bay heating system.

4. **Storm Drains** - The Public Works Department is responsible for stormwater related Capital Improvement Projects and storm drain system maintenance. This work includes pump station repair, telemetry monitoring, and system improvements for all 23 City-owned pump stations that are essential to the protection of property during storm events. Portions of the storm drain system remain deficient in capacity and the City continues to design and construct upgrades to these undersized storm drains as funding becomes available.

The Long Beach Stormwater Management Program (LBSWMP) is now beginning its 12th year and continues to be fully implemented in compliance with its National Pollutant Discharge Elimination System (NPDES) permit, the Federal Clean Water Act (CWA) and subsequent CWA amendments, all of which were adopted to protect receiving waters such as rivers, lakes, and oceans from contamination by preventing pollutants from entering Municipal Separate Storm Sewer Systems (MS4s). Projects to maintain compliance with these permits include repair and upgrade of storm water pumps at various locations in accordance with AQMD regulations. Upcoming projects will install and upgrade telemetry systems, Los Cerritos Channel water quality improvements, Appian Way low-flow diversion, and construction of various citywide storm drain enhancements. These projects will facilitate water quality improvements.

5. **Street Rehabilitation** - Preserving our neighborhoods is a key element of the Long Beach Strategic Plan. The City's Street Rehabilitation Program is designed to meet that goal. The program delivers improvements including, but not limited to, reconstruction and resurfacing of major, secondary, and residential streets, repair of neighborhood sidewalks, access ramps, curbs, and gutters, and rehabilitation of bridges to repair deficiencies identified by the annual Los Angeles County bridge inspection report. The major funding sources include Gas Tax Street Improvement Capital, County Proposition C, County Measure R and General Fund.
6. **Transportation Enhancements** - This section contains programs designed to meet increased needs for mobility resulting from economic growth utilizing a combination of funds. These funds include Proposition C, Gas Tax Street Improvement Capital, Capital Projects, Transportation Improvement Fees,

and Federal and County grants. The transportation improvements include street and intersection widening, traffic signal system expansion and upgrades, transit improvements, neighborhood traffic management, bike lanes, and bike paths. This section also includes programs that monitor and evaluate traffic congestion areas throughout the City and responds with projects to relieve congestion or enhance traffic safety.

7. **Airport** – The Long Beach Airport Department serves 3 million passengers each year and offers a variety of services to airlines, commercial and general aviation users, as well as the general public, providing direct and indirect economic benefits to both the city and the region. Funding for Airport Capital Improvement Projects comes from several sources including Federal Aviation Administration (FAA) Airport Improvement Program (AIP) grants, Passenger Facility Charges (PFC), Customer Facility Charges (CFC), Airport fees and facility charges, and bond sale proceeds. The basis for Airport capital projects is the safety and security of the general public, FAA and Transportation Security Administration (TSA) mandates and operational improvements.

Planned projects in FY 13 include a consolidated rental car facility and mechanical and electrical system improvements for the airport terminal area. Phase III of the air carrier ramp reconstruction and Phase I terminal area improvements including permanent hold rooms, consolidated passenger screening checkpoint and enhanced concessions previously funded will be completed in FY 13. Funding for the new parking structure and the terminal area improvement project comes from General Airport Revenue Bonds (GARBs), a portion of whose debt service is paid for with PFCs. The consolidated rental car facility will be funded by CFCs without the issuance of debt.

8. **Gas & Oil** - The Long Beach Gas & Oil (LBGO) Department oversees 1,900 miles of natural gas pipeline serving 145,000 customer accounts in both Long Beach and Signal Hill. All operations are conducted in strict compliance with U.S. Department of Transportation's (DOT) pipeline regulations, CFR 49 part 190-199. To ensure safe delivery of natural gas to its customers, LBGO is engaged in a long-term pipeline infrastructure replacement program focusing on upgrading pipe (60+ years old) and pipe that shows

evidence of deterioration. LBGO also takes a system-wide approach when designing CIP projects, helping to improve the delivery of gas to its customers. As an example, LBGO is in the process of establishing a 40-pound pressure standard throughout the system, which will replace the original 12-pound pressure sectors. The integrated plan of pressure-consistency, along with replacement of aging infrastructure and corrosion control practices will enhance system integrity, improve reliable delivery, increase gas storage within the distribution system, and reduce potential flow constraints.

Since 2004, approximately 600,000 feet of pre-1955 main pipeline has been replaced and upgraded within the system. In FY 13, LBGO is planning to address another 105,000 feet of main pipe, 3,000 services and 4 emergency shut-off valves. In addition, a key project in the Port will be close to completion by the end of FY 13, which involves the relocation of a 16-inch main pipeline to accommodate the reconstruction of the Gerald Desmond Bridge.

9. **Harbor** – In FY 13, the Harbor Department's (the Port's) projected capital program of over \$720 million demonstrates its commitment to bold and innovative investment for the future while maintaining its commitment to moving cargo in the most effective, technologically advanced, and sustainable manner.

During FY 13, the Port will continue to build upon its successes, while supporting the City's goal of being a significant economic engine for its residents and the region. The Department's plan to invest \$4.4 billion over the next ten years will stimulate the local economy by creating thousands of direct construction jobs, along with indirect services and other commercial opportunities. Significant projects planned for FY 13 include \$261.2 million for the Middle Harbor Redevelopment Project, \$193.4 million for the Gerald Desmond Bridge Replacement Project, \$86.3 million allocated to four separate shore-to-ship power projects, and \$47.8 million for the Pier G Terminal Redevelopment Project.

10. **Successor Agency (SA)** - The Successor Agency (Agency) is the successor entity to the former Long Beach Redevelopment Agency (RDA), which was dissolved by action of the State legislature on February 1, 2012. The Successor Agency is implementing the outstanding obligations of the former RDA, including planned and ongoing Capital

Improvement projects. These projects total \$32.2 million in FY13-FY17 and include park development, improvements to streets and pedestrian rights-of-way, and construction of libraries and public safety facilities.

The Agency is working with the Department of Parks, Recreation and Marine to create open space and recreational opportunities in underserved areas of North and Central Long Beach. A new neighborhood library in North Long Beach will also enhance resources for residents of that area. Improvements to Pine Avenue and the Promenade will help create a residential community in Downtown Long Beach as well as draw visitors. The construction of the new Fire Station 12 and East Police Station will ensure that residents and businesses continue to receive effective safety protection. The Agency is also completing upgrades of a pump station and storm drain in the industrial area of West Long Beach. Street enhancements are ongoing in other areas with median improvements to Atlantic Avenue and Artesia Boulevard and streetscape improvements in the Orizaba Design District. Finally, the Agency is supporting construction of the Deukmejian Courthouse by funding off-site improvements.

11. **Water** - Planned capital improvements to the City's water and sewer system encompass a wide range of projects. The Water Department will continue replacing cast iron water mains, as some are approaching the end of their useful life, with more durable ductile iron pipes. In addition, the Department is continuing with its reclaimed water system expansion, well development and rehabilitation projects, and ocean desalination research and development.

The Sewer CIP budget reflects a significantly increased investment in infrastructure, as the Department moves forward with a five year programmatic CIP based on an updated Sewer Master Plan.

Using the CIP

The Funding Summary section provides an overview of the CIP for programs that have new funding in FY 13. It displays the adopted budget for each capital program including the fund amount and funding source.

The program sections are organized by the type of capital investment. For Public Works managed projects (sections 1-6) and Airport managed projects (section 7), the program

pages contain the following:

- Map - location identification of the new adopted FY 13 capital projects
- Section Summary - an overview of the section from program inception through FY 12 and adopted budget amount for each capital project receiving funding in FY 13. Please reference the Program page example on next page. The Program page contains the following:

- 1) The program title
- 2) The lead managing department and contact information
- 3) The program number
- 4) A brief program description
- 5) Work to be initiated in FY 13
- 6) Estimated schedule for FY 13
- 7) Adopted FY 13 new funding
- 8) Program historical summary

The Funding Detail section towards the back of the book reflects the current carryover balances and the adopted FY 13 CIP budget. Due to the all-years nature of CIP funding, some projects may show a negative carryover at the time of publication attributable to future funding and/or anticipated budget adjustments not yet posted to the CIP. Please note that calculated totals may reflect rounding.

Department: Public Works - Fleet Services

Contact: Paulina Flores (562) 570-5405

FY 13 Program Information

Program Number PW4320

Program Description

This program is to support the operation, maintenance and compliance with local, State and Federal regulations at 14 fuel sites with an additional two underway within the boundaries of the City of Long Beach. Fuel site equipment is replaced based on industry standards or when needed to comply with changes in regulations. Fuel system infrastructure can include above or below ground fuel storage tanks, piping and dispensing equipment, fuel containment systems, alarms and other notification equipment, software for accurately recording fuel use and maintenance of records.

Work to be initiated in FY 13

- Removal of the Underground Storage Tank (UST) at Fuel Site 39, the West Police station located at Santa Fe Avenue. Sludge and rust intrusion are causing contamination of fuel.
- Submit plans and obtain permits to remove existing underground fuel storage tank and install a new one.

Estimated Schedule for FY 13

FY 13 Program Information

Program Number PWT190

Program Description

Construct pedestrian related safety improvements and high priority traffic signal safety improvement projects to address accident prone intersections and safety concerns. Implement countdown pedestrian indications at intersections, flashing beacons at crosswalks, lighting at crosswalks, and crosswalk signals.

Estimated Schedule for FY 13

- Design: October 2012 - December 2012
- Implementation: January 2013 - June 2013
- Construction: July 2013 - January 2014

FY 13 New Funding

Gas Tax Street Improvement Capital	\$1,200,000
Total	\$1,200,000

Work to be initiated in FY 13

All proposed projects are to be designed, bid out, and construction initiated. Installations for the following:

- Advanced Traffic Signal Controllers: 25 new intersection computers to provide for improved traffic flow, enhanced safety, and speed control.
- Atherton Street and Ximeno Avenue: Modernization and left turn arrows for traffic flow and safety improvement.
- Broadway and Redondo Avenue: Modernization and semi-actuated control.
- Countdown Pedestrian Indications: approximately 75 intersections throughout the City.
- Light Emitting Diode (LED) Signal Replacements.
- Magnolia Avenue and Hill Street: Modernization of Traffic Signals (TS), upgrade semi-actuated controls, install pedestrian indications.
- Speed Radar Feedback Signs: 9 new locations.
- Willow Street and Regway Avenue: Address pedestrian safety issues.
- 3rd Street and Lime Avenue: Address pedestrian safety issues.
- 7th Street and Cherry Avenue: Modernization and operational improvements to address elevated accident rate and traffic flow.

Airport Terminal Area Improvements

Department: Airport
Contact: Jeff Sedlak (562) 570-2623

FY 13 Program Information

Program Number AP1030/PW1030

Program Description

The Long Beach Airport terminal building is heavily used on a daily basis, requiring regular major maintenance, repairs and improvements. Anticipated work includes constructing a common-use building for a Phase I Rental Car Facility to house all rental car companies and include a surface parking lot for vehicle storage, customer pick-up and customer return, preparing a Facility Condition Assessment report on the Airport building systems and infrastructure, improving the Airport Terminal building's mechanical and electrical systems and other improvements as needed.

Estimated Schedule for FY 13

- Rental Car Facility Phase I:
 - Design: November 2012 - March 2013
 - Construction: April 2013 - September 2013
- Airport Terminal Area Improvements:
 - Design: April 2013 - December 2013
 - Construction: April 2014 - November 2014

FY 13 New Funding

Airport Capital	\$1,650,000
Airport Customer Facility Charges	\$1,450,000
Total	\$3,100,000

Work to be initiated in FY 13

- Rental Car Facility Phase I: planning, design, and construction in FY 13 and FY 14.
- Facilities Condition Assessment: research, inspections, and program development in October 2012.
- Airport Terminal Area Improvements: terminal mechanical and electrical systems design initiated in FY 13 and construction initiated in FY 14.
