Guide to the Capital Improvement Program (CIP)

Capital Program Overview

Note: Residential street improvements, alley improvements, bikeway and pedestrian improvements, bridge improvements, crack and slurry seal, curb and gutter repair and median repair are not outlined on this map

Guide to the Capital Improvement Program (CIP)

Capital Improvement Planning Process

Development of the annual Capital Improvement Program (CIP) is an intensive process, involving a comprehensive review of the goals and direction of the City's future infrastructure needs. The CIP provides resources to renovate, renew, and expand the City's infrastructure, which is essential to the day-to-day needs of the community and improves resident's quality of life, through improvements to the City's roadways, storm drains and treatment systems, utilities, parks and sports fields, fire and police facilities, libraries, airport facilities, and harbor. Development of the Capital Budget is a broad and extensive process, that seeks to address the objectives of the City's future infrastructure needs and is informed by a wide range of stakeholders, including input from the community.

The CIP also serves as a financial tool, which identifies funds for the wide variety of mid and longer-term capital projects, as well as a planning tool to ensure capital projects are consistent with the City's General plan.

The Adopted Fiscal Year 2025 (FY 25) CIP was developed with input incorporated from public workshops and presentations to community groups and local elected officials. The purpose of this collaboration is to determine specific priorities to enable the city to effectively concentrate its capital investment. To determine the best investments to make now, the size, age, and diverse infrastructure of the city requires significant consideration to realize the most cost-effective and beneficial returns in the future. This CIP furthers the work to ensure that we continue to build equity considerations into the identification and prioritization of infrastructure rehabilitation and expansion. Any capital plan must take into consideration the financial impact on its citizens, balancing the ever-changing needs of the city with the capacity to finance those improvements and the maintenance that comes with them.

Public Works serves as the lead Department for developing the Adopted FY 25 CIP Budget. Public Works, in conjunction with other Departments, reviewed the City's capital needs and prioritized project submittals based on established criteria outlined below. Departments submit projects for funding consideration with a priority ranking, and the Public Works Department, Financial Management Department, and City Manager review and evaluate submittals. Project submittals are also evaluated within the context of available funding limits to ensure that the limited resources available fund priority projects, while at the same time, maintain the City's existing infrastructure and minimize future replacement costs. The following criteria are taken into consideration:

- The ability of the project to meet health, safety, and legal concerns and mandates;
- The value of the project to prolong the life of City assets or avoid / minimize future repair costs;
- The benefit the project will provide the community in support of the goals articulated in the Strategic Plan;
- The potential for the project to generate savings or increase productivity; and
- The extent to which the project will secure future funds through program planning or grant eligibility.

This Document

The CIP identifies the upcoming Fiscal Year's infrastructure expenditures along with providing an outline of proposed funding for future years, based upon an analysis of available funding sources. The City's CIP needs outweigh available resources; therefore, the adopted budget is constrained by funding availability.

Guide to the Capital Improvement Program (CIP)

(continued)

Carryover Balances

The Financial Summaries and individual Program pages include a FY 25 Budget Balance column. These budget balance amounts may be currently planned for projects in the design stage, pending contract award, or committed to an approved contract. Therefore, estimated budget balance amounts are not necessarily available for new projects. Carryover balances are based on fiscal year ending September 2024 data and calculated totals may reflect rounding. This document also includes estimated revenues for FY 26 and FY 27 by funding source. These estimates are subject to change pending further analysis during subsequent fiscal year CIP development.

Operating and Maintenance Costs/Operating Budget Impacts

One of the many issues evaluated through the CIP process is the impact new infrastructure projects and assets may have on departmental operating budgets. As capital improvement projects are considered by the City Council, the operating and maintenance (O & M) costs for these facilities should be estimated so that the City Manager and City Council can assess whether adequate budget is available to operate and maintain these facilities after construction.

Although some additional costs may be absorbed within a department's existing budget, future resources often will be required and requested as part of the budget process for operational expenses associated with capital projects. As part of the Capital Improvement Program budget process, the Public Works Department coordinated with the Financial Management Department and end user department staff to describe and quantify any anticipated O & M costs associated with each new capital project.

O & M costs are addressed at the outset of the process and, if needed, included in proposed adjustments to the operating budgets as part of the annual budget process. As a result, the City Manager and the City Council can prioritize these additional costs, along with other budget requests, based on available funding.

Implementation Criteria

O & M costs are not applied to upgrades and renovations (e.g., major street maintenance projects) since they tend to lower long-term maintenance costs.

Calculating FY 25 Operating and Maintenance Costs

The Public Works Department uses the following criteria to assist partner departments to quantify potential O & M costs:

- FTE (Full Time Equivalent) impacts;
- Utility (water, sewer, refuse, electrical and gas) costs for a facility;
- Maintenance, including HVAC, plumbing, electrical and structural repairs, and landscaping services;
- Custodial services;

Guide to the Capital Improvement Program (CIP)

(continued)

- New operating equipment/supplies; and
- Annual technology replacement contribution.

Dig Once Policy

The Dig Once Policy was established to minimize the number and scale of excavations within the City's right-of-way infrastructure. The Dig Once Policy reduces the costs of infrastructure projects when completed in conjunction with other right-of-way improvements while also facilitating integration of utility projects within the right-of-way. A moratorium is in effect for excavations in the right-of-way that have undergone construction, reconstruction or resurfacing within the previous sixty (60) months, or slurry sealed within the previous twenty-four (24) months. To ensure the most efficient and cost prohibitive delivery of infrastructure projects in the right-of-way, staff from lead departments (Public Works, Technology and Innovation, and the Long Beach Utility Departments) meet periodically to discuss and coordinate current and future projects within the right-of-way.

Indirect Cost Allocation Plan

Cost Allocation Plans are developed each year by an outside consultant to identify the costs of indirect services provided by central service departments based on actual expenditures borne by the General Fund to support all departments and funds. Central services include those provided by the City Auditor, City Clerk, Financial Management, City Attorney, and City Manager Departments, as well as Public Works Administration and Engineering Bureaus for services that apply to capital improvement projects. An indirect cost charge methodology recoups these charges from non-General Fund fund groups by applying rates calculated through the plan to allow actual expenditures incurred in other funds during the fiscal year. The methodology is consistently applied and complies with the Code of Federal Regulations guidelines (2 CFR 200) necessary to recover indirect costs on federal and state grants and awards, and other restricted revenue sources. For the purpose of budgeting, capital improvement projects use a 3% indirect cost rate, but the actual rate can fluctuate from year to year.

Elevate '28 Infrastructure Investment Plan

The City Council approved a five-year (FY 23 – FY 27) infrastructure investment plan as part of the Adopted FY 23 Budget which included the planned use of all unprogrammed forecasted infrastructure revenues from FY 23 through FY 27, including Measure A.

In Fiscal Year 2024, the City Council enlarged the initial FY 23 – FY 27 five-year plan with an additional \$214 million of funding spread across an additional three categories—2028 Olympic Legacy, Community & Cultural Investments, and Gold Medal Park Refresh Projects—and branded the plan as the Elevate '28 Infrastructure Investment Plan.

In Fiscal Year 2025, the City Council adopted an updated Elevate '28 Infrastructure Investment Plan totaling \$933 million, which includes over \$306 million of Measure A funding and over \$627 million of funding anticipated from additional funding sources, such as LA Metro Transportation Funding (Prop A, Prop C, Measure M, Measure R), State Gas Tax, SB-1, LA County Measure W, and various grant awards. The plan includes over 180 projects, as well as right-of-way improvements, located

Guide to the Capital Improvement Program (CIP)

(continued)

throughout the City spread across eight funding categories:

- Mobility & Safety Improvements: \$422,594,818
- 2028 Olympic Legacy: \$210,527,918
- Community & Cultural Investments: \$17,000,000
- Gold Medal Park Refresh Projects: \$61,215,000
- Park Improvements: \$44,765,244
- Public Facilities: \$50,115,000
- Right-of-Way / Water Quality / Climate Action and Adaption Plan: \$107,450,000
- Critical Facilities and Grant Match Funding Reserve and Other Critical Needs: \$19,100,241

The Elevate '28 Infrastructure Investment Plan provides a substantial funding boost to the City's plan to revitalize the City's infrastructure, prepares the City to be a showcase for the world during the 2028 Olympics, and continues to improve and enhance City parks, major corridors, public facilities, and visitor-serving areas. The Elevate '28 Plan is a planning tool which allows the City to concentrate multi-year resources to fund critical and complex projects. Appropriation of funding within the Elevate '28 plan takes place during the annual CIP budget process and when grant awards are accepted and appropriated by the City Council throughout the fiscal year. The Elevate '28 Plan is updated once per year via an update to City Council during the annual budget development. All forecasted FY 23 to FY 27 Measure A infrastructure funding is included in the Elevate '28 Plan. To see which Elevate '28 projects are to be funded in FY 25 Adopted CIP with Measure A funding, please refer to the Measure A section of the CIP Chapter.

The public is encouraged to explore the plan by utilizing the Elevate '28 website, which can be accessed via the Public Works webpage (longbeach.gov/pw). The Elevate '28 website serves as a communication hub for Elevate '28 project information, including unique individual project information pages, which provide project details such as scope, budget, location, target construction start and completion dates, amount of funding currently secured, and current phase of the project. The website also allows users to search for projects by council district, project category, and via map view. Project information is updated quarterly. Additionally, the website includes a Power BI data table, which allows the public to easily sort and filter the Elevate '28 information in greater detail.

Fiscal Year 2025 Capital Improvement Program

Adopted Funding Summary

Total Adopted FY 25 Capital Funding: \$228,790,467

Fiscal Year 2025 - 2027 Capital Improvement Program

Estimated Funding Summary

Total Estimated FY 25 - FY 27 Capital Funding: \$579,061,432

Airport

Beaches and Marinas

Harbor

Mobility and Safety

Parks

Public Facilities

Utilities

Program Title: This summarizes the description of the Program. The City's diverse programs range from Sustainable Transportation to Park Infrastructure to Major Arterial Improvements.

Program Number: The reference number used to identify the specific Capital Investment Program.

Program Budget for FY 25: The beginning balance plus the adopted funding for FY 25 Budget, the funding source shows the different funds making up the total program budget.

FY 25 and Future Years Totals: The total amount of new funding that is estimated to be allocated to the program in the current and future fiscal years.

Strategic Investments

Adopted Capital Projects

Provided below is a summary of adopted capital improvement projects for FY25. These projects are funded through a variety of sources. Additional detail can be found in the FY25 program pages.

Title	Description	Estimated Cost
Airport		\$2,000,000
AIRPORT LANDSIDE IMPROVEMENTS	Post-security areas such as the concourse facility and the pre-security areas such as the historic terminal building and adjacent roadways are heavily used on a daily basis. The upkeep of these facilities and infrastructure are critical to support air travel operations and maintaining an award-winning travel experience.	\$1,000,000
AIRPORT AIRFIELD IMPROVEMENTS	Repairs and improvements necessary to comply with Part 139 Certification requirements. Improvements are emergency repairs and unforeseen maintenance on utility, pavement, crack sealing, slurry sealing, signage, lighting replacement, and paving.	\$1,000,000
Beaches and Marinas		\$8,950,000
BEACH FACILITY IMPROVEMENTS	Funding for projects and project contingencies to address unforeseen expenses for existing projects. Design and construct safety and as-needed repairs at beach and marina facilities.	\$3,200,000
BEACH PARKING LOTS REHABILITATION	Improvements and maintenance to existing beach parking lots, as well as, crack and slurry seal to ensure longevity since initial capital renewal.	\$900,000
BEACH STAIRWAY REPLACEMENT	Improvements and repairs to the City's various tidelands and beach access staircases to improve coastal access.	\$300,000
PIER AND DOCK IMPROVEMENTS	Improvements to the City's various overwater marine structures to improve coastal public access, safety, and increase recreational opportunities.	\$1,000,000
SEAWALL IMPROVEMENTS	Repairs to the permanent seawalls located at Naples Island. Improvements include the following: new wall system, guard rails, relocation of private docks and pile guides, landscape, sidewalks, public benches, drainage system, access platform, and new street lighting.	\$750,000
LAGOON AND WETLANDS IMPROVEMENTS	Construct water quality and drainage improvements in the wetlands, Colorado Lagoon and surrounding area to meet water quality requirements.	\$2,800,000
Mobility and Safety		\$104,112,805
CIP ADMINISTRATION	Continuing administration of ongoing transit and/or paratransit programs or projects. As well as direct administration associated with managing local return programs or projects.	\$10,322,096
ADA RAPID RESPONSE	Construct and/or improve verified requests for right-of-way access and investigate new requests when received.	\$550,000
ALLEY IMPROVEMENTS	Ongoing repair and/or replacement of existing alleys identified in the Alley Management Plan.	\$1,500,000

Strategic Investments

Adopted Capital Projects (continued)

Title	Description	Estimated Cost
Mobility and Safety		
ARTERIAL CORRIDOR ENHANCEMENTS	Design and construct multi-modal and complete street improvements along major roadway corridors. Enhancements include transportation facilities that benefit vehicles, pedestrians, bicyclists and transit users.	\$10,332,904
ARTERIAL STREET REHABILITATION	Reconstruction and resurfacing of city streets to extend useful life, provide incidental curb, gutter and sidewalk improvements, construct curb ramps and bus pads, and replace pavement markings.	\$20,945,000
BIKEWAY AND PEDESTRIAN IMPROVEMENTS	Design, construct and implement projects and programs to enhance the safety and viability of the City's bicycle and pedestrian network.	\$4,050,000
BRIDGE IMPROVEMENTS	Perform maintenance to prolong the life of bridges and reduce future infrastructure expenses related to infrastructure degradation and heavy vehicular usage.	\$1,300,000
ADA CURB RAMP IMPROVEMENTS	Construct sidewalk curb ramp improvements.	\$9,883,805
MEDIAN AND PARKWAY IMPROVEMENTS	Improvements may include re-landscaping and turf conversion to reduce water requirements and installation of solar powered irrigation controllers.	\$2,550,000
NEIGHBORHOOD TRAFFIC MITIGATION	Enhancement and improvement projects to safety, mobility and active transportation throughout City neighborhoods.	\$500,000
PARKING GARAGE IMPROVEMENTS	Upgrades and improvements made to existing parking garage structures to minimize structural deficiencies, extend the useful life of the structures, and improve energy efficiency.	\$1,000,000
PARKING LOT IMPROVEMENTS	Improvements and maintenance to existing City parking lots, as well as, crack and slurry seal to ensure longevity.	\$700,000
RESIDENTIAL STREET IMPROVEMENTS	Repair residential streets and alleys through pavement sealing, asphalt overlays, and full reconstruction.	\$27,129,000
ADA SIDEWALK IMPROVEMENTS	Reconstruct sidewalk improvements associated with ADA path of travel request and ADA non-compliant ramps.	\$2,650,000
CITYWIDE SINKHOLES	Apply permanent repair or temporary patching of sinkholes and subsidence in the public right-of-way.	\$1,250,000
SLURRY SEAL	Repair residential streets through pavement sealing and slurry sealing.	\$4,250,000
CITYWIDE STRIPING & SIGNAGE PROGRAM	Install, replace, and maintain street name signs, traffic control signs, and traffic and pedestrian striping at various locations, as-needed, throughout the City.	\$4,600,000
TRAFFIC SIGNAL IMPROVEMENTS	Construct pedestrian related safety improvements and high priority traffic signal safety improvements.	\$600,000
Parks		\$22,675,000
PARK AMENITY IMPROVEMENTS	Repair and maintenance to prolong the life of park amenity infrastructure and reduce future expenses related to heavy usage.	\$5,650,000

Strategic Investments

Adopted Capital Projects (continued)

Title	Description	Estimated Cost
Parks		
OPEN SPACE DEVELOPMENT	Acquisition of park land and development of parks throughout the City.	\$7,300,000
PARK FACILITY IMPROVEMENTS	Repair and maintenance to prolong the life of municipal park buildings and reduce ongoing infrastructure expenses.	\$9,000,000
PARK LIGHTING	Replace conventional High Pressure Sodium (HPS) lights with Light Emitting Diodes (LEDs) to extend the useful life and reduce energy costs.	\$725,000
Public Facilities		\$12,806,662
FACILITY IMPROVEMENTS	Improvements to City buildings to minimize structural deficiencies, extend the useful life of facilities, and improve energy efficiency.	\$12,681,662
ENERGY EFFICIENCY IMPROVEMENTS	Improvements to public facilities to reduce the amount of energy required to provide services.	\$125,000
Utilities		\$78,246,000
STORM DRAIN SYSTEM IMPROVEMENTS	Construct drainage improvements and maintain storm drain system Citywide.	\$1,000,000
WATER QUALITY IMPROVEMENTS	Water quality improvements citywide to ensure compliance with the Clean Water Act.	\$4,800,000
LB ENERGY RESOURCES MAIN PIPELINE REPLACEMENT	Long Beach Energy Resources - Main Pipeline Replacement	\$6,066,959
LB ENERGY RESOURCES SYSTEM IMPROVEMENTS	Long Beach Energy Resources - System Improvements	\$2,128,933
LB ENERGY RESOURCES GAS METER REPLACEMENT	Long Beach Energy Resources - Gas Meter Replacement	\$1,779,108
SEWER FUND	Upgrades and improvements to the City's sewer infrastructure.	\$12,400,000
WATER FUND	Upgrades and improvements to the City's potable and reclaimed water infrastructure.	\$50,071,000

Section Summaries

The Adopted Capital Budget and CIP presented in this document will guide the City in the planning, scheduling, and budgeting of capital improvement projects over the next year. This overview highlights the major capital investments within each of the seven capital programs listed in the following pages. The strategic capital investment in the City's infrastructure includes major enhancements and repairs to critical public assets and the CIP focuses on the renovation, renewal, and expansion of City infrastructure that is critical to serve the day-to-day needs of our community. In particular, the next three years are expected to see a surge of infrastructure activity as a number of new projects have been funded with Measure A Bond proceeds, included in the Elevate '28 Infrastructure Investment Plan, approved by City Council in FY 2024.

How this Document is Organized

The CIP budget is comprised of seven sections of capital improvement programs defined by the type of capital investment. The Public Works Department manages the following sections: Beaches and Marinas, Mobility and Safety, Parks, Public Facilities, and Stormwater/Environmental Compliance under the Utilities section. The Airport, Harbor and the Long Beach Utility Departments manage their respective sections of the CIP.

Program Section Overviews

Airport

Long Beach Airport (LGB) offers a variety of services to air carriers, commercial and general aviation users, as well as the traveling public. Funding for Airport Capital Improvement Projects is derived from several sources including Federal Aviation Administration (FAA), Airport Improvement Program grants (AIP), Transportation Security Administration (TSA) grants, Passenger Facility Charges (PFC), Customer Facility Charges (CFC), Airport fees, and operating revenues. The focus of the Airport Capital Improvement Program is to continue improving the safety, security, and operations of the Airport to meet the mandates of the FAA and TSA.

In FY 24, the Airport, in partnership with the Department of Public Works, completed the installations and commissioning of the solar canopies on parking structures A and B. The design and construction of the solar canopies were funded by an owner-operator power purchase agreement, which is also funding the ongoing maintenance.

The Terminal Area Improvements Program (Phase II) is nearing completion. The Meeter and Greeter Plaza hardscape areas and the remaining restrooms, concession space, and baggage service offices opened to the public on March 11, 2024. Progress continues with the Historic Terminal Renovations which includes the Rental Car Customer Service Counters and is anticipated to be complete by January 2025.

The \$16.5M Terminal Roadway Improvements project continues to progress and is estimated to be completed in February 2025. The project consists primarily of the construction of two new crosswalks, roadway, and pedestrian island between the Terminal and (future) Ground Transportation Center, widening of Donald Douglas Drive adjacent to the Terminal building, modifications to the intersection of Barbara London Drive and Donald Douglas Drive, vehicle wayfinding signage, asphalt and concrete pavement, roadway striping, and various landscape improvements.

The Airport's budget includes a total of \$2 million for FY 25. These improvements include \$1 million for Airfield Pavement Rehabilitation and \$1 million for Airport Terminal Area Improvements.

Beaches and Marinas

Two assets that help make Long Beach unique are its beaches and marinas. These City-operated and maintained assets provide recreational enjoyment to both residents and visitors. In FY 24, the City completed the following projects, Junipero Sports Court and Skating Area, Aquarium Parking Garage LED Upgrades and Naples Catch Basin Repairs and Seawalls Grouting.

The City continues to invest and enhance its coastal and natural resources through the Colorado Lagoon Open Channel Restoration project, which is currently under construction and is expected to be completed in FY 25. High quality public access along the waterfront continues to be a priority, as the City expects to break ground on the Davies Boat Launch Ramp, Parking Lot, and Restroom Improvement project to improve boater access and feature enhanced amenities like fish cleaning stations and upgraded restrooms.

In FY 24, design and engineering were completed for the Rainbow Lagoon Curb Repair Project and the Marina Green Parking Lot Rehabilitation, which will feature new infiltration basins and EV chargers. The Convention Center Roof Rehabilitation plans were also completed, that allow for the installation of solar panels to help meet energy efficiency goals as a city and provide and re-establish the lifespan of the roof. Investments in these facilities will continue to help support the City's entertainment and tourism areas and enhance the overall user experience.

The Beaches & Marinas budget includes a total of \$8.95 million of new funding for FY 25 of which \$7 million is tidelands and \$1.95 million is Measure A funding.

Mobility and Safety

The Mobility & Safety section contains programs designed to meet the increased needs for mobility resulting from economic growth, utilizing a combination of different funding sources. Funding sources include the City of Long Beach Measure A, Los Angeles County Proposition A and C, Gas Tax Street Improvement Capital, Transportation Improvement Fees, Los Angeles County Measure M and R, AB 2766, State Road Maintenance and Rehabilitation Act, along with Federal, State, and County grants.

Mobility improvements include roadway rehabilitation, complete streets and corridor improvements, traffic signal system and intersection upgrades, transit improvements, replacement parking and traffic lane striping, neighborhood traffic management, and mobility enhancements in the right-of-way. This section also includes programs that evaluate traffic impacts throughout the city while responding with projects to reduce vehicle miles traveled (VMT), provide balanced transportation options, and enhance traffic safety.

When designing arterial and local streets, each location is addressed using the complete streets design framework. When designing a roadway, several factors are considered such as the conditions for people who walk, bicycle, and use public transportation. The program delivers various improvements including reconstructing and resurfacing of major, secondary, and residential streets; upgrading accessibility of curb ramps to comply with current American Disabilities Act (ADA) regulations; installing bicycle facilities; replacement of street signs; repairing neighborhood sidewalks, curbs, and gutters; and rehabilitating bridges to repair deficiencies identified by bridge inspection reports.

The paving program is guided by the City's Infrastructure Investment Plan (IIP) and Pavement Management Program (PMP), which is updated biannually. Staff also plan projects to coordinate with Community Development, the Utilities Department, and projects from other departments and agencies. The program is designed to make the best use of limited funds. This is not a "worst first" methodology, as the City uses a balanced approach between maintaining "good" streets in good condition, while also allocating funding to eliminate the backlog of streets in "poor" condition. There are several factors that are taken into consideration when the City evaluates the selection of streets, such as the Safe Streets Long Beach Plan, Bike Master Plan, surface and subsurface conditions, utility work (pipeline construction), future developments in the area, and potential conflicts with other projects. The goal is to rehabilitate a roadway when it is in "good" condition versus delaying repairs to a state in which the street is in a "poor" condition, which significantly increases the costs of repairs.

In FY 24, Public Works completed 45 lane miles of arterial street repairs, 43 lane miles of residential street repairs, 7.3 miles of alley restoration, 42 lane miles of Complete Street Corridor projects, and slurry sealed 9,000,000 square feet of street.

The following Complete Street/Corridor projects design phase were completed in FY 24: Studebaker Road Improvements between 2nd St to Carson Ave, Shoreline Drive Realignment, and the Mid-City Traffic Signal Improvements – area bordered by Alamitos/7th/Redondo/Ocean.

The following Complete Streets/Corridor projects will continue in the design phase into FY 25: Pacific Ave Cycle Track, between Ocean Blvd to Anaheim St; Pine Ave Bike Blvd, North of 11th St; Orange Avenue Backbone Bikeway; Atlantic Avenue Corridor improvements between Ocean Boulevard and San Diego Freeway; Willow Street Corridor Improvements between West City Limits to City of Signal Hill; and the Downtown Walkable Street Corners Project. Also notable is the Shoemaker Bridge Improvement Project that will continue its design phase into FY 25. The Shoemaker bridge project has a tentative construction end date in 2028. Traffic Engineering is also designing pedestrian medians and bulb-outs at all 20 pedestrian/bicycle priority intersections on the High Injury Network identified in the Safe Streets Long Beach Plan.

The following Complete Street Projects will begin construction in FY 25: Anaheim Street Improvements between LA River and PCH; Studebaker Road Improvements between 2nd St to Carson Ave; Del Amo Boulevard between Long Beach Boulevard and Atlantic Avenue; and Clark Avenue between Anaheim Street and Monlaco Road.

Construction is anticipated to be completed in FY 25 for the following Complete Street Projects: Market St Improvements between LA River and Cherry Avenue and the Artesia Great Boulevard project.

The adopted Mobility budget includes over \$104 million of new funding for FY 25, of which \$58.4 million has been budgeted for street rehabilitation and arterial corridor enhancements throughout the City. The budget also includes Measure A funds totaling \$47.2 million for various mobility safety improvements.

In addition to Measure A funding, Mobility also receives local, state, and federal funding. This includes improvements to sidewalks, bridge rehabilitation and seismic retrofit, sustainable transportation, traffic mitigation, traffic and pedestrian signal improvements, and administration.

Parks

Long Beach has over 170 parks and over 3,000 acres of open space that are used daily by residents and visitors. Parks contribute greatly to the livability of Long Beach, host festivals, concerts and athletic events that draw thousands of visitors, bringing tourism revenue to local restaurants, hotels, and stores, all while boosting the local economy.

Many of Long Beach's parks and open spaces face aging infrastructure and there is a significant effort to rehabilitate existing park assets and infrastructure. Deferred critical repairs have resulted in necessary capital projects to rehabilitate various park sites, while providing an opportunity to upgrade to more energy and water efficient systems. Through intentional planning and design, new parks, playgrounds, and open spaces provide public benefits including access to nature, promoting healthy and active lifestyles, and providing spaces and places for children to learn, socialize, and play.

In FY 24, the City completed construction of the El Dorado Duck Pond, Rose Park Improvements, Davenport Park Gas Treatment and Control System (Phase 1) and Davenport Park Expansion (Phase 2), 14th Street Park Playground, El Dorado Park Sports Fields Fencing Improvements (Phase 2) and Basketball Court Improvements, Bixby Park Lighting Improvements, and initiated construction on the improvements at the historic Bixby Park Bandshell. The Department also

initiated construction on several park projects including the MacArthur Park Rehabilitation, El Dorado Sports Fields Restroom and Joe Rodgers Park Restroom improvements. These improvements will not only modernize these restrooms but improve their overall accessibility.

Other significant milestones in FY 24 include the bidding and advertising of three major projects including Ramona Park Playground, Silverado Park Playground, and the new 51st Street Greenbelt Park, which will add new recreational amenities and open space in the City of Long Beach.

The FY 25 adopted budget for Parks is \$22.7 million, of which \$16.7 million is Measure A funding.

Public Facilities

The City of Long Beach owns over 250 facilities throughout the City that continue to provide residents with public services, recreational opportunities, places to learn, and public safety. These facilities include but are not limited to the following: Libraries, Health Facilities, Fire Stations, and Police Stations.

In FY 22 the City completed the Citywide Facility Condition Assessment (FCA), which measures the Facility Condition Index (FCI) of each facility. The FCI helps prioritize funding for repairs that will address leaking roofs, HVAC, energy efficiencies, structural repairs, maintenance, and other deficiencies. The assessments form the basis of capital improvement programming and identify early action items for facility maintenance. The FCA/FCI data allows staff to identify and prioritize items in need of repair based on resources available at the time.

In FY 24, the following public facility projects were completed: Animal Care Facility Improvements, Bay Shore Library Window Replacement, Drake Park Community Center HVAC and Roof, Fire Department Academy Training Tower

Repairs, Fire Department Headquarters Generator Project, Los Altos Library HVAC Improvements, Scherer Park Community Center Improvements. Design was completed for Drake Park Community Center Interior Improvements, North Police Department HVAC and Roof Replacement, and Police Department Crime Lab. Design is underway for the downtown Senior Center, El Dorado Branch Library Improvements, Main Health Building Improvements, West Health Department Childcare Facility, and the West Police Station Fire Alarm System Upgrades. Projects currently under construction are the Fire Station 14 Workforce Privacy Improvements, Police Department Training Academy, Mark Twain Library HVAC Energy Upgrades, Burnett Library Roof Replacement and HVAC Energy Upgrades, Bayshore Library Improvements, and the Los Altos Library HVAC Upgrades.

As part of the declared Homeless Emergency, the City initiated various projects to address homelessness. Construction is underway for Project Homekey at 5950 Long Beach Blvd., Project Homekey at 1725 Long Beach Blvd., Multi-Service Center Roof and HVAC Upgrades, Youth Shelter and Navigation Center, and Emergency Shelter Roof Upgrades. Design is underway for the Emergency Shelter Interior Improvements.

In FY 25, additional Health Department locations, Libraries, Fire Department facilities, and Police Department facilities are anticipated to begin design work and/or construction related improvements.

The FY 25 adopted budget for Public Facilities includes \$12.8 million of which \$11.2 million is from Measure A funding.

Harbor

The Harbor Department (Port), with its deep-water channels, rail access, and ongoing investment in state-of-the-art facilities, continues to be the preferred gateway for Asia-Pacific trade and an operational model for its environmental innovations and initiatives. The Port continues to implement a long-term capital improvement program designed to provide Port tenants with secure, state-of-the-art facilities capable of accommodating international trade and safeguarding regional economic benefits in a sustainable manner while ensuring economic vitality, ecological health, and community integrity.

The Port forecasts investing \$2.3 billion in capital projects over the next decade to increase cargo-handling efficiency and enhance competitiveness. This investment will also stimulate the economy by creating thousands of direct construction jobs along with indirect service and commercial opportunities.

In FY 2025, the Port is forecasting to spend \$368.3 million on capital projects (excluding furniture, fixtures, and equipment). Most notable is a \$219.8 million investment to enhance rail infrastructure, with the centerpiece being the Pier B On-Dock Rail Support Facility Program budgeted at \$204.9 million. This project alone represents over half of the entire FY 2025 capital budget. Other significant projects involve enhancing port-wide safety and security, critical infrastructure upgrades to sewer, street, water and storm water assets, and investing in projects that further advance the Port's environmental initiatives.

Utilities

The Utilities section is comprised of three services to Long Beach residents. These critical services are provided by the Long Beach Utilities Department and the Public Works Stormwater Management Division. In addition, these departments work closely to coordinate water, gas, and street improvement projects in the right-of-way, adhering to the City's "Dig Once" policy preventing any newly paved or slurried street from being torn up. In FY 25, the Utilities budget includes a total of \$78.2 million of new funding.

Long Beach Utilities Department

Water

Planned capital improvements to the City's water and sewer system encompass a wide range of projects. The Utilities Department will continue replacing aging infrastructure that is approaching the end of its useful life, including, but not limited to, water pipelines, valves, and meters. The Department continues to coordinate pipeline projects with Public Works' Street Rehabilitation projects. The Department issued bonds in FY 24 to facilitate an increased, multi-year, investment in its water infrastructure. Planned capital improvements include drilling new local water wells, refurbishing existing wells, and rehabilitating existing storage tanks.

These investments will improve production, conveyance, treatment, storage, and distribution of water to its customers. The Sewer CIP budget reflects a sustained level of investment in infrastructure, as the Department follows a programmatic CIP based on an updated Sewer Master Plan.

In FY 25, Water is forecasting \$62.5 million in Capital Projects. Of this amount, \$50.1 million is in the Water Fund and \$12.4 million is in the Sewer Fund.

Natural Gas

In November of 2022, voters approved Measure BB amending the city charter to merge existing natural gas and water utilities into one publicly operated entity, the Long Beach Utilities Department. The Gas operation under the new Utilities Department oversees approximately 1,900 miles of natural gas pipelines. The Department's objective is to provide safe and reliable natural gas services to over 150,000 businesses and households in the most cost-efficient manner. All operations are conducted in strict compliance with the U.S. Department of Transportation (DOT) pipeline safety regulations - 49 CFR Parts 190-199, and local government codes. The Department is engaged in a long-term pipeline infrastructure replacement program focusing on pipelines and facilities identified in its Distribution Integrity Management Plan (DIMP). In the past decade, over 100 miles of distribution main and service pipelines have been installed or replaced to improve overall system integrity.

The Capital Improvement Program (CIP) takes a system-wide approach to find patterns and targets pipeline replacement in areas of high risk or consequence within the system. There are numerous factors that affect which pipelines are selected for replacement including age, material type, leakage history, etc. In addition to pipeline replacement, the

CIP addresses capital needs to maintain and operate regulator stations, valves, rectifiers, and other gas facilities. The CIP funds mandated critical programs such as cross bore inspections, meter replacement, gas facility surveys, cathodic protection, and equipment inspections. The Department will continue to work closely with the Public Works Department to coordinate gas pipeline projects with street improvement projects.

In FY 25, a total of nearly \$10 million was adopted for natural gas projects including main and service pipeline replacement, gas meter replacement, and sewer lateral inspections (cross bores).

Stormwater/Environmental Compliance

The Stormwater Management Division is responsible for maintaining the City's storm drain pipeline network and pump stations and monitoring stormwater quality within Long Beach. Water quality compliance is handled through the City's National Pollutant Discharge Elimination System (NPDES) permit. The City continues to invest Measure W funding to implement the Watershed Management Program, construct the Long Beach Municipal Urban Stormwater Treatment (LBMUST) Facility, install and maintain low flow and trash capture devices, and other projects to keep Long Beach in compliance with its NPDES permit.

Additional Stormwater projects being funded in FY 25 include: Citywide Catch Basin Trash Excluder Installations, Los Cerritos Channel Sub-basin 4 Stormwater Capture Facility, LFD Systems, Deforest Wetlands Trash Mitigation, Skylinks Golf Course Stormwater Capture System, installation of a Trash Interceptor Barge, update to the 2004 Stormwater Master Plan, and Phase 2

of the Long Beach Municipal Urban Stormwater Treatment (LBMUST) project.

In FY 25, a total of \$5.8 million was adopted for stormwater and environmental compliance projects of which \$1 million is Measure A funding.

RESIDENTIAL STREET IMPROVEMENTS

3003170000

Project Description Repair residential streets and alleys through pavement sealing, asphalt overlays, and full reconstruction. Repair work to also include replacement of damaged curbs gutters, drive approaches, installation of access ramps and replacement signage.

Estimated Operating and Maintenance Repair and maintenance to prolong the life of residential streets and reduce future infrastructure expenses related to normal erosion, root damage and vehicular usage.

Project Timeline Design: October 2024 - January 2025
Construction: January 2025 - September 2025

Department Contact Public Works - Transportation Project Management - Vahik Vartanians - (562) 570-5786

AIRPORT LANDSIDE IMPROVEMENTS

3701010000

Project Description The Airport's landside improvements consists of facilities and areas that support commercial passenger activity at the Airport. The concourse facility, meeter and greeter plaza, concession space, baggage service area, and the the historic terminal building and adjacent roadways are heavily used on a daily basis. This high usage leads to unforeseen repairs to the existing infrastructure and equipment. The upkeep of these facilities and infrastructure are critical to support air travel operations and maintaining an award-winning travel experience.

Estimated Operating and Maintenance Upgrades are intended to prolong the life of the infrastructure and ensure the terminal is modernized, efficient and accessible for future use.

Project Timeline Design and Construction on a continuous basis.

ARTERIAL CORRIDOR ENHANCEMENTS

3003030000

Project Description Design and construct projects that focus on multiple modes of transportation. Improvements along major roadways include transportation facilities that will improve the level of safety for all who traverse the corridors. Vehicles, pedestrians, bicyclist and transit users will experience an improved level of comfort that will proactively encourage multi-modal use.

- Atlantic Avenue: Ocean Boulevard to 405 Freeway
- Anaheim Street Major Corridor Improvements
- Willow Street: West City Limit to Signal Hill City Limit

Estimated Operating and Maintenance Repair and maintenance to prolong the life of the improvements and reduce future infrastructure expense.

Project Timeline Design and construction on a continuous basis.

Department Contact Public Works - Transportation Project Management - Mouhsen Habib - (562) 570-5115

Harbor

The Harbor Department (Port), with its deep-water channels, rail access, and ongoing investment in state-of-the-art facilities, continues to be the preferred gateway for Asia-Pacific trade and an operational model for its environmental innovations and initiatives. The Port continues to implement a long-term capital improvement program designed to provide Port tenants with secure, state-of-the-art facilities capable of accommodating international trade and safeguarding regional economic benefits in a sustainable manner while ensuring economic vitality, ecological health, and community integrity.

The Port forecasts investing \$2.3 billion in capital projects over the next decade to increase cargo-handling efficiency and enhance competitiveness. This investment will also stimulate the economy by creating thousands of direct construction jobs along with indirect service and commercial opportunities.

In FY 2025, the Port is forecasting to spend \$368.3 million on capital projects (excluding furniture, fixtures, and equipment). Most notable is a \$219.8 million investment to enhance rail infrastructure, with the centerpiece being the Pier B On-Dock Rail Support Facility Program budgeted at \$204.9 million. This project alone represents over half of the entire FY 2025 capital budget. Other significant projects involve enhancing port-wide safety and security, critical infrastructure upgrades to sewer, street, water and storm water assets, and investing in projects that further advance the Port's environmental initiatives.

Fiscal Year 2025 Capital Improvement Program

Summary of Harbor Department Projects^{*(1)}

	Project Forecast at Completion	Inception Through FY 23 Actuals	Inception Through FY 24 Expenditures	Adopted FY 25 Budget
Railways & Bridges

Total Other Capital Projects	\$1,031,691	\$113,737	\$56,282	\$128,130
Total Capital Projects	\$6,221,386	\$3,662,619	\$254,121	\$370,150

* All projects stated in thousands.

^[1] Only projects with FY 2024 expenditures or FY 2025 budgeted amounts are shown.

^[2] Category comprised of many smaller value projects. Expenditures are not tracked cumulatively since new projects will continue to be added as current ones are completed.

^[3] Furniture, Fixtures, and Equipment category is part of Harbor Department's Non-Personnel Budget and is not tracked cumulatively for all years.

Grant Funding Not Identified in CIP Book

FY 24 Approved Grant Funding

Please note this page represents grants that were appropriated between 10/01/23 – 09/31/2024 and not considered new money (not appropriated during the annual budget preparation process).

<u>Project Name</u>	<u>Granting Agency</u>	<u>Award Amount</u>
Implementation of Medium and Heavy-Duty Zero-Emission Vehicle Infrastructure	California Energy Commission (CEC)	\$5,000,000
Studebaker Corridor Improvements	Southern California Association of Governments (SCAG)	\$5,000,000
Shoemaker Bridge	LA County Metro	\$5,000,000
Shoreline Realignment Project	LA County Metro	\$4,300,000
Atlantic Corridor Study	LA County Metro	\$195,500
Atlantic-Pacific New Signals Project	CalTrans	\$76,500
Micro-Transit Shuttle	South Coast Air Quality Management District	\$410,734
Rancho Los Cerritos and Rancho Los Alamitos	California Board of State & Community Corrections	\$3,500,000
51 st Street Greenbelt Project	United States Department of Housing and Urban Development	\$1,800,000
Junipero Beach Sports Courts	National Fish and Wildlife Foundation	\$150,000
Shoreline Drive Gateway Corridor Realignment	United States Department of Transportation	\$30,000,000
Del Amo Bicycle and Pedestrian	Port of Long Beach	\$2,999,700
Anaheim Corridor Improvements	State Highway Safety Improvement Program	\$2,827,170
Anaheim Corridor Improvements	Coronavirus Response and Relief Supplemental Appropriations Act	\$2,209,296

Fiscal Year 2025 Unfunded Capital Needs

Unfunded Capital Improvements Projects

Although the adopted FY 25 Capital Improvement Program budget provides for vital infrastructure improvements throughout the city, additional high priority needs remain. Identification of unfunded needs, or unidentified funding, provides a method for communicating resource requirements of projects that are not fully funded and for which a fund source has not yet been identified.

Projects identified where no current funding exist are categorized as unfunded. To date, the city has completed assessments of its streets, alleys, sidewalks, pump stations and City owned facilities. The list below is not a complete listing and is not listed by priority order. The dollar amounts listed below are estimates and subject to change.

Unfunded Projects are tracked for consideration in future funding cycles. In some cases, these are still high priority projects, but they may need to be deferred for a number of reasons such as exploring opportunities to leverage City funds with external funding, or to acknowledge workload considerations where existing staffing capacity is fully committed to other urgent projects. In some cases, staff is able to continue preliminary work until it is possible to fully fund a broader effort.

Citywide Street Improvements

The City utilizes a Pavement Management Program (PMP) to plan, budget, fund, construct, maintain, and rehabilitate the City's pavement network to provide maximum effectiveness with available funds. The PMP is guided by regularly recurring evaluations of the conditions of the pavement network based on surveyed pavement structural integrity, roughness, and surface distress. Each surveyed roadway is assigned a Pavement Condition Index (PCI) score. Per the City's latest PMP updated in 2023, the City's roadways are in "fair to marginal" condition with an average (PCI) score of 56 out of a possible 100. The PMP also identified a 33% backlog for street reconstruction. A backlog of this magnitude indicates the need for a larger investment to stay ahead of the growing depreciation rate of the overall pavement network condition. Per the 2023 PMP, an investment of \$1.4 billion over 5 years is required to fix all the City's major and minor street deficiencies.

Program Name	Recommended Funding
Arterial & Residential Streets	\$280 million per year
Unfunded Cost Estimate for 5 years:	\$1.4 billion

Alley Paving

The City's Alley Management Plan (AMP) was updated in 2023. The AMP identified an average PCI score of 50 with a backlog of 30% and an estimated total alley deficiency of \$96 million for the 215 miles of alleys within the city. Per the AMP, an investment of \$96 million over 5 years is required to fix all the City's alley deficiencies.

Program Name	Recommended Funding
Alley	\$19.2 million per year
Unfunded Cost Estimate:	\$96 million

Fiscal Year 2025 Unfunded Capital Needs

Stormwater Protection System

The estimated investment necessary to maintain the stormwater conveyance system including storm drainage systems and pump stations is \$840 million. The city completed a 2015 Pump Station Assessment which identified a \$35 million need. Due to further aging, the most recent FY 23 estimate increased the need to \$103 million. The City's 2005 Stormwater Master Plan and Management System is outdated and requires a comprehensive review to update areas where land use has changed, FEMA zones have changed, and projects have been completed.

Program Name	Recommended Funding
Stormwater Conveyance System	\$840 million
Unfunded Cost Estimate:	\$840 million

Citywide Facility Repairs

In FY 22 the City completed the Citywide Facility Condition Assessment, which measures the Facility Condition Index (FCI) of each facility. The FCI helps prioritize funding for repairs that will address leaking roofs, HVAC, energy efficiencies, structural repairs, maintenance, and other deficiencies. The City of Long Beach portfolio consists of 253 structures located across the city with a total of \$435 million in necessary expenditures over the study period that was identified. The unfunded need for facility repairs is estimated at \$526 million in FY 25 due to escalation cost.

Program Name	Recommended Funding
General City Building Refurbishment	\$526 million
Unfunded Cost Estimate:	\$526 million

Sidewalk Management Plan

The city completed a comprehensive review of the City's sidewalk infrastructure in 2019. This plan found a need for over \$631 million (including ADA curb ramps) for investment in the City's sidewalks. This plan evaluated all pedestrian facilities, including sidewalks and curb ramps, to determine the extent to which individuals with disabilities may have restricted movement throughout the City's right-of-way. This information allowed the city to update its ADA Transition Plan and further the City's ongoing commitment to all residents, employers, businesses and visitors for creating an inclusive and accessible place to live, work, and play. This plan found a need for \$631 million for investment in the City's sidewalks and ADA curb ramps.

In FY 17 The City entered into a consent decree to ensure ADA compliance for curb ramps and sidewalks by completing an estimated \$313 million in improvements over 30 years. The necessary ADA improvements are included within the overall Sidewalk Management Plan noted above.

Program Name	Recommended Funding
Sidewalk/ADA Curb Ramps	\$631 million
Unfunded Cost Estimate:	\$631 million

Total Estimate CIP Unfunded Need: \$3.5 Billion

Fiscal Year 2025 Capital Improvement Program

Glossary

AB2766 (Air Quality): This funding source was enacted to support programs that reduce air pollution from motor vehicles. Funds are collected by the Department of Motor Vehicles (DMV) and subvended to the South Coast Air Quality Management District (AQMD) for disbursement. The City receives these funds to implement programs and measures that reduce air pollution from motor vehicles mandated by the requirements of federal and state Clean Air Acts and the Air Quality Management Plan (AQMP).

AB2928 (Traffic Congestion Relief): The State Assembly Bill that established legislation for the Traffic Congestion Relief Fund in the State Treasury for allocation of street and road funds to cities and counties for maintenance and reconstruction. This funding source was replaced in 2002 by the Transportation Congestion Improvement Act. See State Proposition 42.

AB32 (California Global Warming Solutions Act of 2006): AB32 authorizes the collection of a fee from sources of Green House Gas (GHG). This fee is collected annually by the LBER Department that captures auction proceeds from credits the City receives as a natural gas provider. 25 percent of available monies in the fund are to be used on projects that reduce GHG emissions in disadvantaged and low-income communities.

Americans with Disabilities Act of 1990 (ADA): A Federal law enacted to provide for the protection of individuals with disabilities. This protection ranges from prohibitions against discrimination in employment to specific requirements for modifications of public facilities and transportation systems.

Airport Area Assessment District: The assessment district formed for the purpose of constructing upgrades in the airport area to improve traffic flow. The upgrades include street widening, grade separation, dedicated turn lanes, traffic signals, and signage. See Assessment District.

Airport Capital: A sub-fund of the Airport Fund. This is the non-grant portion of the Airport Fund capital expenditures. See Airport Fund.

Airport COPS: Certificates of Participation issued by the Long Beach Airport to fund capital improvements. See Certificates of Participation.

Airport Fund: The fund designation is used to account for revenues and expenditures applicable to the operation and maintenance of the Long Beach Airport and its leaseholds. The major revenue sources consist of revenues related to airport operations leases and grants. The Airport Fund is an Enterprise Fund. See Enterprise Fund.

Airport Customer Facility Charges: A fee is charged by car rental agencies on each rental transaction and passed on to the Airport to expend on a car rental facility or transportation system between the rental facility and the terminal.

Airport Passenger Facility Charges: The amount added to the passenger airline ticket to provide a funding source for airport improvements.

Appropriation: An authorization granted by the City Council that permits officials to make expenditures and incur obligations for specific purposes.

Assessment District: A separate local government entity was formed to provide specific local public services. Assessment districts can be established to provide a single service such as sewage treatment or to provide multiple services such as police and fire protection, parks and recreation facilities, and water distribution systems. Property owners within the assessment district's boundary pay into the district in direct proportion to the benefits or services they receive.

Beginning Balance: Unspent funds carried over from prior fiscal years that become part of the FY 25 appropriation.

Bond: A method of financing long-term debt, issued by a government or private corporation, which bears interest.

Budget: A plan of anticipated expenditures and revenue for a certain period.

California Energy Commission: California's primary energy policy and planning agency.

Caltrans: The State of California Department of Transportation. Caltrans administers both U.S. Department of Transportation grants and its own grants for improvements to streets and highways.

Caltrans Construction Cooperative Grant: A grant issued by Caltrans for the City of Long Beach

to provide various services in connection with the State's Interstate 710 construction project.

Capital: Assets that add to the long-term net worth of the City.

Capital Improvement: Construction or major repair of City-owned buildings and infrastructure which helps meet health, safety, legal concerns and mandates, prolongs the life of City assets, avoids or minimizes future repair costs, benefits the community, supports goals articulated in the City of Long Beach Strategic Plan, has the potential to generate operating savings or increase productivity, and is consistent with the City's General Plan.

Certificates of Participation (COPS): Interest-bearing debt instruments sold to investors by a non-profit agency to finance construction. The agency then leases the facility and uses the revenues to repay the debt.

CFD No. 5 Bond: See Community Facilities District (CFD) No. 5 Bond.

CFO: Chief Financial Officer.

CIP Category: A group of similar programs organized into a major section of the CIP budget document.

Civic Center 1997A Bond: A bond issued in 1997 by the Long Beach Finance Authority to fund various capital improvement projects in the Civic Center Complex.

Civic Center Capital: A sub-fund of the Civic Center Fund. The non-bond portion of the Civic Center Fund capital expenditures. The major ongoing revenue source to the Fund is rental payments from the departments occupying the facilities.

Civic Center Fund: The fund designation used to account for revenues and expenditures applicable to the operation and maintenance of the City Hall Complex and the Main Library Complex. The major ongoing revenue source to the Fund is rental payments from the departments occupying the facilities.

Coastal Conservancy Grant: State bond proceeds used to provide grants that protect coastal or ocean resources from development, natural, or economic conditions. Established in 1976, the California Coastal Conservancy is funded largely by State bonds.

Community Development Block Grant (CDBG): Federal entitlement funds (based on various criteria)

received by the City of Long Beach from the U.S. Department of Housing and Urban Development (HUD) for the purpose of benefiting low and moderate-income areas and disabled residents.

Community Facilities District (CFD) No. 5 Bond: The 2000 Special Tax Bonds issued to finance the acquisition and construction of certain street and other public improvements for the Long Beach Towne Center.

Construction Support: Engineering work during the construction process, which ensures that projects are constructed in accordance with design parameters and specifications. Primary construction engineering functions include construction, inspection, laboratory services, field surveys, and design plan updates or interpretation.

Contract Award Process: Procurement preparation for Council award and all pertinent contract documentation prior to the initiation of construction.

Debt Service: The principal and interest payment on borrowed money according to a predetermined schedule.

Department of Boating and Waterways (DBAW): A State agency that provides grants and loans for improvements in the Tidelands areas of the City.

Design: The process of identifying project options, developing a project scope, conducting feasibility analyses, and creating plans, specifications, and estimates for a capital improvement. Primary design engineering functions include drafting, design, development of specifications, and traffic engineering.

Economic Development Administration (EDA): Created by Congress pursuant to the Public Works and Economic Development Act of 1965 to generate new jobs, retain existing jobs, and stimulate industrial and commercial growth in economically distressed areas of the United States.

Edison Grant: A grant received from Edison International under the LED Traffic Signal Rebate Program to provide for more energy efficient traffic signals.

Environmental Enhancement and Mitigation Program (EEMP) Grant: Annually, the EEMP offers grants for projects to mitigate the environmental impacts caused by new or modified state transportation facilities. These grants are offered to local, state, and federal governmental agencies. The EEMP was established in 1989.

El Dorado Regional Park Development Grant: A National Park Service federal grant administered by the State Department of Parks and Recreation to upgrade the El Dorado Park campsites.

Enterprise Fund: The fund designation used to account for City operations that are financed and operated in a manner similar to private business enterprises. The intent of the City in using this type of fund is to determine that the costs (expenses, including depreciation) of providing these services to the general public on a continued basis are financed or recovered primarily through user charges. The City's Enterprise Funds include Airport, Development Services, Gas, Refuse/ Recycling, Sewer, Towing, Water, and SERRF.

Environmental Protection Agency (EPA) Grant: Federal funds used to address environmental issues for pre-approved projects.

FAA: Federal Aviation Administration.

FAA AIP Program Grant: An Airport Improvement Program (AIP) grant from the FAA to construct capital improvements for pre-approved projects at the Long Beach Airport.

FEMA: Federal Emergency Management Agency. Provides funds, services, hiring, and post-disaster assistance for response and recovery in the event of natural disasters.

FEMA HMGP: The FEMA Hazard Mitigation Grant Program. The Governor's Office of Emergency Services (OES) administers this program in California.

Fiscal Year (FY): A designated time frame that identifies the beginning and ending dates for recording an entity's financial transactions. The fiscal year for the City of Long Beach is from October 1 through September 30.

Fleet Capital: A sub-fund of the Fleet Fund. It is comprised of the non-grant and non-bond portion of the Fleet Fund capital expenditures. See Fleet Fund.

Fleet Fund: The fund designation used to account for revenues and expenditures applicable to the City's operation, maintenance, and timely replacement of the City's fleet of vehicles and equipment. There are two major sources of ongoing revenue for the Fund, Fleet Services charges to the City departments and land rental payments.

Fund: An accounting entity with a self-balancing set of accounts recording financial resources and transactions for specific activities.

Fund Type: A classification term used to group funding sources into specific categories of government functions or services.

Funding Source: The specific source of appropriated funds.

FY 25 New Budget: The new allocation of monies that is part of the FY 25 budget appropriation.

Gas Capital: A sub-fund of the Gas Fund. This is the non-grant portion of the Gas Fund capital expenditures. See Gas Fund.

Gas Fund: The fund designation used to account for revenues and expenditures applicable to activities associated with the transmission and distribution of natural gas to the City's users. The Gas Fund is an Enterprise Fund. See Enterprise Fund.

Gasoline Tax Street Improvement Capital: A sub-fund of the Gasoline Tax Street Improvement Fund. This is the non-grant portion of the Gasoline Tax Street Improvement Fund.

Gasoline Tax Street Improvement Fund: The fund designation used to account for revenues and expenditures of gasoline tax funds apportioned under the State Streets and Highways Code, as well as other sources dedicated to transportation improvements. Expenditures may be made for any street-related purpose on the City's system of streets, including maintenance. In addition to the gasoline tax revenue from the State of California, other transportation-related revenue sources include funding from the Federal Transportation Equity Act for the Twenty-First Century (TEA-21) and the State Traffic Congestion Relief Fund and State Proposition 42 (AB2928).

General Capital Projects Fund: The fund designation used to account for the all-years Capital Improvement Program with multiple funding sources, including the General Fund that pays for the City's general projects.

General Fund: The fund designation used to account for financial resources applicable to the general governmental operations of the City of Long Beach. The largest sources of revenue for the General Fund are property taxes, sales taxes, utility user's taxes, and motor vehicle license fees.

Grants: Disbursement of assets from another government agency or entity to be expended for a pre-approved purpose, activity, or facility.

Highways-Through-Cities Grant (HTC): A Los Angeles County financial aid program to assist cities

with their major and secondary highway rehabilitation projects. This is a discretionary program based on each Supervisor's decision regarding which projects to assist in the cities within their district. Financing is provided by each County Supervisor District's Road Construction program allocation of State gas tax funding.

HBRR: Highway Bridge Rehabilitation and Replacement Program. See TEA-21 HBRR.

Health Fund: The fund designation used to account for revenues and expenditures applicable to the support of the operations of the Department of Health and Human Services.

HVAC: Heating, ventilation, and air conditioning.

Internal Service Fund: The fund designation used to account for the finance of goods and services provided by one City department to another on a cost-reimbursement basis, e.g., computer services, fleet services, etc., including depreciation.

ISTEA: Intermodal Surface Transportation Efficiency Act (of 1991). The Transportation Equity Act for the Twenty-First Century (TEA-21) superseded this funding source in 1998. The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) superseded TEA-21 in 2005. The Moving Ahead for Progress in the 21st (MAP-21) Century Act supersedes SAFETY-LU in 2012.

LED: Light Emitting Diode. A component of an electronic display.

Long Beach and Los Angeles Harbor Contributions: Monies received from the Long Beach and Los Angeles Harbors to fund various street improvements to improve the traffic flow out of the Long Beach and Los Angeles harbor areas.

Los Angeles County Grant: Grants issued by the County of Los Angeles to the City of Long Beach to fund various capital improvement projects.

Los Angeles County Measure A - The Los Angeles County Regional Park and Open Space District (RPOSD) is responsible for implementing the Safe, Clean Neighborhood Parks and Beaches Measure of 2016 (Measure A). Measure A was approved by Los Angeles County voters in November 2016 and provides dedicated, local funding for parks, recreation, beaches, open space, trails, cultural facilities, and related projects throughout LA County. It is financed by an annual parcel tax of 1.5 cents per square foot of development.

MAP-21: The authorized bill that governed United

States federal surface transportation spending. The bill was signed into law by President Bush on August 10, 2005 and expired on September 30, 2009 but Congress renewed its funding formulas ten times after its expiration date, until replacing the bill with Moving Ahead for Progress in the 21st (MAP-21) Century Act in 2012. The \$286.4 billion measure contained a host of provisions and earmarks intended to improve and maintain the surface transportation infrastructure in the United States, including interstate highway system, transit systems around the country, bicycling and pedestrian facilities, and freight rail operations.

Marina Capital: A sub-fund of the Marina Fund. The non-grant and non-loan portion of the Marina Fund capital expenditures. See Marina Fund.

Marina Fund: The fund designation used to account for the revenues and expenditures applicable to the operation, maintenance, and development of the City's marinas in the Tidelands area.

Measure A: In June 2016, Long Beach voters approved Measure A for a 10-year period and was extended indefinitely by voters in 2020. Measure A is a Transaction and Use Tax, which added a transactions and use (sales) tax on the sale and/or use of all tangible personal property sold at retail in the City.

Measure D: In November 2010, Long Beach voters approved Measure D, a City Charter amendment that removed control of oil properties and all oil operations in the Port of Long Beach from the Long Beach Board of Harbor Commissioners, giving the authority instead to the Long Beach City Council. Measure D transfers 5% of the port's gross earnings to Tidelands Operating Fund.

Measure M: A sales tax ballot measure passed by voters on November 8, 2016. Voters authorized a Los Angeles County Traffic Improvement Plan through a half-cent sales tax and continue the existing half-cent traffic relief tax improving transportation and easing traffic congestion.

Measure R: A ballot measure proposed by Los Angeles County that was passed in 2008. This increases the county sales tax by one half-cent to fund transportation projects. Collection of Measure R sales tax revenue commenced on July 1, 2009.

Measure W: Approved by voters in the November 2018 election, Measure W is funded by a parcel tax of 2.5 cents per square foot of impermeable areas (like concrete) within the County. The parcel tax will increase Los Angeles County's

local water supply and improve water quality. The tax was imposed beginning in the county's fiscal year, July 1, 2019.

Mobile Source Air Pollution Reduction Review Committee (MSRC): The MSRC was created in 1990 by the California State Legislature as part of AB 2766 that authorizes the Department of Motor Vehicles (DMV) to collect a \$4 surcharge on vehicle registration fees. Under AB 2766, 30% of the \$4 is part of a "discretionary" fund overseen by the MSRC, 30% is distributed to the SCAQMD, and 40% is distributed to local cities and counties in the South Coast Air District to be used for clean air projects.

MTA Grant: State and Federal funding awarded to the City of Long Beach through the Metropolitan Transportation Authority (MTA) "Call for Projects".

Non-Point Source Pollution (NPS): Water pollution originates from many different sources rather than one specific, identifiable source. NPS occurs when rainfall, irrigation waters, and water habits (washing cars/pets) create a flow over land and impervious surfaces and are deposited into the receiving waters via the storm drain system.

Park Impact Fees: Fees collected on new residential development to mitigate the impact on Parks, Recreation, and Marine facilities for the purpose of assuring that the parkland and recreational facility standards established by the City of Long Beach are met considering the additional needs created by such development.

Program: A specific undertaking for the delivery of a capital improvement including procurement, construction or installation of facilities or related equipment.

Proposition A: A source of funding from the Los Angeles County sales tax of one-half cent used exclusively to construct, improve, and maintain mass transit services and facilities. See Transportation Fund.

Proposition 1B (Transportation Bond): Funding derived from Budget Bill SB78 and Trailer Bill SB88 and implemented as "The Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006" passed by the voters in November 2006. This authorized the state to sell approximately \$20 billion of general obligation bonds to fund transportation projects to relieve congestion, improve the movement of goods, improve air quality, and enhance the safety and security of the transportation system.

Proposition C: A source of funding from the Los Angeles County sales tax of one-half cent used to

construct, improve, and maintain mass transit services and facilities. This funding also provides an expanded list of eligible project expenditures including congestion management programs, bikeways and bike lanes, street improvements supporting public transit service, and pavement management system projects. See Transportation Fund.

Proposition C MTA Grant: See MTA Grant.

Proposition 42: See State Proposition 42.

Public Safety Facilities Capital Improvements Lease Revenue Bond: The 2002 bond issued by the Long Beach Finance Authority to finance public safety facility capital improvement projects.

Rainbow Harbor Area Fund: The fund designation used to account for revenues and expenditures applicable to the operation, maintenance, and development of the City's Rainbow Harbor area.

Rainbow Harbor Capital: A sub-fund of the Rainbow Harbor Area Fund. The non-grant and non-loan portion of the Rainbow Harbor Area Fund capital expenditures.

Road Maintenance and Rehabilitation Act (RMRA): Senate Bill (SB) 1, a source of funding from the State of California which increases the per gallon fuel excise taxes, increases diesel fuel sales taxes, and vehicle registration fees. The state controller started depositing new funding into the RMRA account on November 1, 2017.

Safe Routes to School Program: Administered by Caltrans, this 2003 program provides state and federal funds for projects that protect the safety of children traveling to and from school. Projects were developed through collaboration with the Long Beach Unified School District.

SERRF Refunding 03 Bonds: The 2003 refunding bonds for the finance of the construction of the Southeast Resource Recovery Facility (SERRF).

Senate Bill (SB) 1: See Road Maintenance and Rehabilitation Act (RMRA).

Sewer Capital: A sub-fund of the Sewer Fund. The non-grant portion of the Sewer Fund capital expenditures. See Sewer Fund.

Sewer Fund: The fund designation used to account for revenues and expenditures applicable to the operation, maintenance, and replacement of the City's sewer system in a cost-effective manner. The major sources of revenue include a water usage charge based on water that will enter the sewer

system and a service charge based on the size of the customer's water meter. The Sewer Fund is an Enterprise Fund.

Skylinks Golf Course 03 Bonds: The 2003 bond issued by the Long Beach Finance Authority to finance improvements to the Skylinks Golf Course.

South Coast Air Quality Management District (SCAQMD): Agency responsible for preparation of the state implementation plan (SIP) applicable within its boundaries, adoption of control regulations for stationary sources, and implementation of indirect source and transportation control measures.

State Bond Act of 1988: The 1988 bond issued by the State of California to fund various parks and recreation projects.

State Grant – California Endowment Fund: State funding awarded to the City of Long Beach to establish a Latino Diabetes Prevention and Management Program.

State Grant – Energy Commission: Funding authorized by Assembly Bill 970 and administered by the California Energy Commission (CEC). These funds were used to purchase and install light-emitting diode (LED) traffic signals and battery back up systems.

State Grant – Public Libraries: Funding for new library facilities provided under the California Reading and Literacy Improvement and Public Library Construction and Renovation Bond Act of 2000.

State Implementation Plan (SIP): The 1970 Clean Air Act requires each state to develop a state implementation plan to attain National Ambient Air Quality Standards (NAAQS) by the applicable attainment deadlines. SIPs must be approved by the Federal Environmental Protection Agency.

State Library Bond: California Reading and Literacy Improvement and Public Library Construction and Renovation Bond Act of 2000 (Proposition 14). The bond proceeds are designated for site acquisition, new building construction, remodeling, renovation, and upgrading electrical and telecommunications systems.

State Proposition 12 Bond: Funding derived from Assembly Bill 18 and Senate Bill 1147 and implemented as the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000. The program includes entitlement (funding for cities based on population) and competitive grants for improvement of park land and facilities.

State Proposition 13 (Costa-Machado Water Act of 2000) - Coastal Non-Point Source Program: A source of funding from the State Water Resources Control Board (SWRCB) for the Los Angeles River and Colorado Lagoon California Beaches Initiative projects.

State Proposition 40 Bond: Funding derived from the California Clean Water, Clean Air, Safe Neighborhood Parks, and Coastal Protection Act of 2002. Proposition 40 provides both entitlement and competitive grant programs to California cities for improvement of community recreation areas.

State Proposition 40 Water Board Grant: Funding derived from the SWRCB from the Clean Beaches Initiative. This grant was obtained for the remediation of the Colorado Lagoon.

State Proposition 42: Funding derived from Assembly Bill 2928 and implemented as State Transportation Congestion Improvement Act, passed in 2002. This requires sales and user taxes on motor fuels to be used for public transportation, city and county road repairs and improvements, and state highway improvements.

State Proposition 46 Jobs Housing Balance Incentive Grant: The Housing and Emergency Shelter Trust Fund Act of 2002. This authorized the award of a one-time \$25 million grant for cities and counties meeting the terms and conditions of the program for the 2001 calendar year. The City obtained this grant as part of the matching fund requirement for the MacArthur Park Branch Library project.

State Transportation Improvement Grant: Federal funds from the Department of Transportation given to the State of California for major transportation projects. This funding has been used primarily for Citywide street repair and improvements.

State Water Bond 2000: Funding derived from the Safe Drinking Water, Clean Water, Watershed Protection, and Flood Protection Act of 2000. The funds are administered by the SWRCB for non-point source pollution control, watershed management plan development and implementation, wastewater recycling, and the protection of various targeted watersheds.

TDA-SB821: Transportation Development Act funding from sales tax receipts as specified in the California Streets and Highways Code. The TDA SB-821 is the Senate Bill that established legislation for the Transportation Development Act.

Transportation Equity Act for the Twenty-First Century (TEA-21): Enacted on June 9, 1998, this federal legislation authorizes the Federal surface transportation programs for highways, highway safety, and transit. TEA-21 provides states with the flexibility to set their own transportation priorities and to explore creative financing mechanisms within certain guidelines. TEA-21 supersedes the 1991 ISTEA program.

TEA-21 HBRR: Highway Bridge Replacement and Rehabilitation funds used specifically for bridges within the city limits. See TEA-21.

TEA-21 MTA Grant: See MTA Grant.

Temple/Willow Bond: Bonds issued by the City to fund the construction of the new Fleet and Towing facility located on the corner of Temple Avenue and Willow Street.

Tidelands Operations Capital: A sub-fund of the Tidelands Operations Fund. The non-grant and loan portion of the Tidelands Operations Fund capital expenditures. See Tidelands Operations Fund.

Tidelands Operations Fund: The fund designation used to account for revenues and expenditures applicable to the operations, maintenance, and development of the convention center and beaches in the Tidelands area.

Traffic Improvement Fee: Fees collected from land developers to mitigate cumulative traffic impacts. Sometimes referred to as Transportation Development Fees. The goal of the Traffic Improvement Fee is to relieve arterial congestion, accommodate planned growth, and implement specific programs. Traffic Improvement Fee monies are appropriated in the Capital Projects Fund.

Transactions and Use Tax (Measure A): additional sales tax added for transactions on the sale of all tangible personal property sold at retail in the City for a 10-year period starting in January of 2017.

Transportation Development Act: The Transportation Development Act TDA SB-821 of 1971, the law provides funding to be allocated to transit and non-transit related purposes that comply with regional transportation plans. Funding comes from sales tax receipts as specified in the California Streets and Highways Code.

Transportation Fund: The fund designation which accounts for revenues and expenditures applicable to the City's share of an additional one and a half percent sales tax. The tax is collected by the County

of Los Angeles to finance transportation projects: Propositions A, 1B, C, and Measure R.

TSM-State Grant: Traffic System Management funds administered by the California Department of Transportation (Caltrans) for traffic-related improvements. Receipt of the grant funds is contingent upon Caltrans's approval of the proposed projects.

Upland Oil Revenue Fund: An oil fund used to account for proceeds from oil operations north of the mean high tide in Long Beach, oil fields of working interest of Signal Hill east and west, and Recreation Park on the north side of 7th Street and Marine Stadium. Revenues are used to spur investment opportunities in one-time capital improvements, budget requirements, and essential needs. The Upland Oil fund will allow for important contributions to public safety, infrastructure, libraries, parks, recreation, and technology.

Urban Area Security Initiative (UASI): A grant awarded by the U.S. Department of Homeland Security to the City of Long Beach to fund planning, equipment, training, and personnel costs associated with the protection of critical infrastructure in and around the Long Beach Urban Area.

Water Fund: The fund designation used to account for revenues and expenditures used to meet the water needs of the citizens of Long Beach with a dependable supply of high-quality water at a reasonable cost. The major sources of revenue include a volumetric charge for water used by customers and a service charge based on the size of the customer's water meter. The Water Fund is an Enterprise Fund. See Enterprise Fund.

West Long Beach Business Park Assessment District: The assessment district established to fund various street improvements in the West Long Beach area. See Assessment District.
